Kauly R. Bohm
Software Developer

About me

I have been interested in coding for many years and I completed my first coding qualification more than 10 years ago. Although I have had a variety of jobs in the past, coding has always been my passion. Finally five years ago I was able to pursue coding on a fulltime basis and I started coding professionally. It's been so rewarding, I started as an intern and made my way up in the ranks quickly after that. The journey brings me opportunities to work with amazing people and make products used by hundreds of people worldwide. I am very grateful for that.

Now for the technical part. I have been working as a full-stack developer, centered in the JS world and all the cool stuff that it brings to the table, React, NextJs, Hasura, Firebase, TS, that is, the usual letters soup. I am always learning new things and I am very excited to work with new technologies. You will find a reliable coworker in me, always willing to help and learn from others, documenting my progress, and being realistic about deadlines and features. I hope you enjoyed reading this and please, feel free to contact me.

Experience

Sortium

Full Stack Developer

Apr 2021 - Feb 2023

I worked as a full-stack developer, using React, NextJs, Hasura, and Firebase. During this time I participate in the development of two NFT marketplaces. I also started to learn Rust and use Bevy to develop games.

Freelancer

Full Stack Developer

Mar 2020 - Apr 2021

I worked as a freelancer, developing websites and web applications for small and medium businesses. All jobs with React. I spent most of this time working for the same client developing a real-time chat application for customer services. This chat is used by thousands of people daily in Brazil.

iTER

Frontend Developer

Aug 2019 - Mar 2020

Working doing maintenance and new features for the company's main product, a web application for fleet management. I also worked on the development of a new product, a system to track all things and not only vehicles. This company was sold to a big company in a million-dollar deal here in Brazil

tdsoft

Frontend Developer

Mar 2019 - Aug 2019

Work on the team responsible for switching the company main product from Java to React and Next.

Gesec

Fullstack Developer

Sep 2018 - Feb 2019

This company had software used by security forces, it was a map-based real-time application to manage occurrences. Mainly, React, Redux, Mapbox, MongoDB, and Express were used to develop this application.

GETMORE

Intern - Backend Developer

May 2018 - Sep 2018

Here I spent most of my time doing unit and integration tests for Express routes
